

SNHX 12054 Z6P

APPLICATION

- Double-sided disc milling insert
- Thickness .213" for cutters 938...10mm

GRADE Z6P

This is a TIN PVD coated fine grained WC-Co carbide within ISO-grade range P25-P50 for machining of steel and stainless steel with disc mills 938

	STEEL	STAINLESS	CAST IRON	NON FERROUS	S.ALLOYS	HEAT TREATED

LEGEND

Sfm (Vc)	Surface Feet per Minute
Fn (ipr)	Feed per revolution
Fz (ipt)	Feed per tooth
ap	Depth of cut

FORMULA

$S \text{ (RPM)} = Sfm * 12 / \pi / D = \text{rev per minute}$
$F \text{ (IPR, inch per revolution)} = S * Fn = \text{feed per minute}$
$F \text{ (IPM, inch per minute)} = S * Fz * n.\text{flutes} = \text{feed per minute}$
$Sfm = S * D * \pi / 12$
